> curl https://nwen304-shopping-project.herokuapp.com/signup

return value:
The return value is the source code of signup page

Signup a new user

> curl -X POST -H "Content-Type: application/x-www-form-urlencoded" -d 'email=curl@test&password=123456&name=test'
"https://nwen304-shopping-project.herokuapp.com/signup"

return value:
If successes
Redirecting to /profile

else

Redirecting to /signup

Test get `/products/:category_id`

> curl https://nwen304-shopping-project.herokuapp.com/products/57623034ec93478e42015cfb

Output:
Get the source code of a page that show all products of one category

Input a wrong category_id 57623034ec93478e42015c and get :
> curl https://nwen304-shopping-project.herokuapp.com/products/57623034ec93478e42015c
Output:
Get the source code of a page that show error information

Test get `/product/:product_id`
> curl http://localhost:8080/product/5762870adcba0f583c669509
Output:
Get the source code of a page that show details of a product
Input a wrong product_id 5762870adcba0f583c669509 and get :
> curl http://localhost:8080/product/5762870adcba0f583c6695
Output:
Get the source code of a page that show error information

Test get `'/page/:page'`
> curl http://localhost:8080/page/1
Output:
Get the source code of a page that show show products that index is :page
Input a wrong product_id 22 and get:
> curl http://localhost:8080/product/22
Output:
Get the source code of a page that show a empty page with page navbar

Test get `'/pagenotlogin/:page'`
> curl http://localhost:8080/pagenotlogin/1
Output:
Get the source code of a page that show show products that index is :page with login buttons
